I went to the consultation meeting in Rhooose yesterday. My questions are why is an access road being built to the bypass instead of sending the traffic through the village. Also no amenities are being provided as what happened with Rhooose point. There is also the problem with the college traffic plus more houses being built at Rhooose point and also the ongoing battle at Model farm. More houses are being built at Weycock cross adding to traffic congestion. The proposed changes to Weycock cross roundabout will not work because if you put traffic lights on port road to allow traffic out of the proposed development by the toby inn the amount of traffic coming from Rhooose would be a nightmare. If you lived around here you would know that you only have to have roadworks on port road coming from the airport and it's gridlocked for hours. There also is only one train and bus an hour so if you're trying to get cars off the roads these need to be increased.
